

## **Screws**

Got a minute? This is Olivia, Megan, and Sarah. It is May 2011. At Kearney Elementary in Kearney. Now to you Sarah

We are telling you about screws. Screws are a type of incline plane wrapped around a shaft .The incline plane is also called a twine. Megan tell us some examples of screws

Some examples of screws are light bulbs, bottle lids, bottle caps, bolts and nuts. Screws are important because they hold things together. If screws weren't around then things would fall apart.

Now that we have screwed with your time we would like to thanks you for listening .This is Olivia, Sarah, and Megan. In Kearney at Kearney Elementary May 2011.now you know a little more about screws.
